Good summary. One area that will get more scrutiny will be private wells and I have a problem making them add up. We say we will sample 70 wells total. Then we say that the number of wells we sampled was:

- 30 on 8/11
- 35 on 8/12
- (none ?) on 8/13
- 35 on 8/14, and
- 25 remaining wells on 8/15

So...I get at least 125 wells...not 70.
